## A STRATEGIC PARTNERSHIP

New Access and swissQuant bring together the benefits of a portfolio management system, the digital front-end and an advanced risk engine and portfolio construction solution.

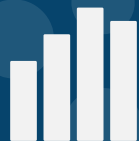

## A COMBINED PLATFORM

- Provide a centralized view and cockpit for the portfolio manager to monitor risk on all levels and through each step,
- Enhance analysis capacities to bring the best solution to the final client,
- Embed key indicators and live calculations from portfolio analysis to ordering decisions.

### THREE STEPS

- 1 Portfolio Level**  
First step deep portfolio analysis and decision making: Risk Analytics
- 2 Position Level**  
Needs to be available at all levels from Security to the Portfolio
- 3 Security Level**  
With on-the-fly calculation and pull refresh

## AN IDEAL COMBINATION

With this new offering, private banks and wealth managers benefit from an ideal combination between New Access Banker's Front, a digital front-end solution and swissQuant's ImpaQt solution, an advanced risk engine and portfolio construction solution.

The joint platform allows banks to provide highly individualized services towards their end clients.
